

What to do if Workbench shuts down and you think that you lost your files

- 1. DO NOT REOPEN WORKBENCH!** Opening Workbench deletes the files in the buffer
- 2. Go to Start-> My Computer -> C:\buffer**
- 3. Drag the files to the desktop**
- 4. Now reopen Workbench (Start-> Startup -> Workspace).** The files are saved on the desktop.
- 5. Go to the Stored Waveforms in Buffer**
- 6. Under File Options, click “Load New Waveforms”**
- 7. Select the .txt waveforms from the desktop.**
- 8. Convert the files to JPG like normal**
